CET

The online-Constellation-Board was developed specifically for use in online constellations of all kinds.

Since its **first launch on 1 January 2021**, there have been several revolutionary developmental thrusts that currently make this tool the most **versatile and innovative** of its kind.

However, the online-Constellation-Board is **constantly evolving** at a rapid pace, which is why even experienced users will find it worthwhile to take another look at the details.

In these 2 hours, **Georg Breiner, the Master Mind** behind the online-Constellation-Board, will give you hands-on **tips** for practical use and all the innovations that respond specifically to customer wishes.

Get to know the **latest features** and even take a look behind the scenes where **unpublished experimental functions** are already available for testing.

Bring concrete questions and you will get **new approaches and solutions!**
